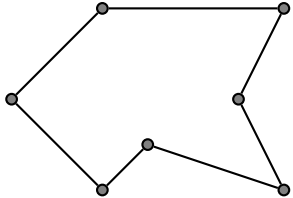
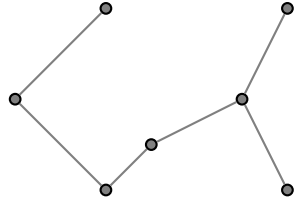
Approximation Algorithms

A 2-approximation algorithm for TSP



$c(TSP)$



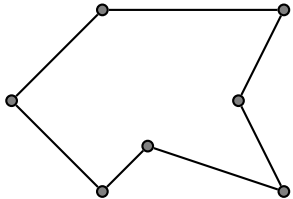
$c(MST)$

$c(MST) \leq c(TSP)$

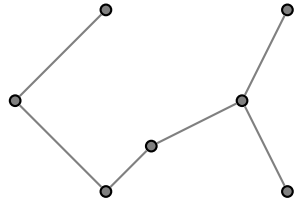
$c(H) \leq 2 \cdot c(MST) \leq 2 \cdot c(TSP)$

Approximation Algorithms

A 3/2-approximation algorithm for TSP



$c(TSP)$



$c(MST)$

$$c(MST) \leq c(TSP)$$

$$c(H) \leq c(MST) + c(M) \leq c(TSP) + \frac{1}{2}c(TSP) = \frac{3}{2} \cdot c(TSP)$$

Satisfiability		
Traveling Salesman		
Scheduling		
Knapsack		
Bin packing		

Course Formalities

Prerequisites:

- ✔ Programming (DM502, DM503, DM550)
- ✔ Algorithms and Datastructures (DM507)
- ✓ Complexity and Computability (DM508, DM553)
- ✓ Linear and Integer Programming (DM559, DM545, DM554)

Credits: 10 ECTS

Language: English or Danish

Classes: intro: $2h \times 24$; training: $2h \times 24$

Material: slides + text book + articles + starting code

Assessment (10 ECTS)

- Two practical project assignments passed/failed with internal censor by the teacher (include programming in Python)

- Oral exam based on:
  - the theoretical part
  - two practical assignments

  Grading by the danish 7-mark scale with external examiner. Exam aids allowed.
